Mobile: +91-9608034977

SKILLS

- Languages: C++, SQL, JavaScript, Java
Frameworks: React.js, Node.js, Express.js, Spring Boot, Tailwind CSS
Tools/Platforms: Git & GitHub, MongoDB, PostgreSQL, Postman, Figma
DevOps: Linux, Docker, Kubernetes, Jenkins, Maven
Soft Skills: Problem-Solving, Quick Learner, Adaptability

PROJECTS

- Workify | GitHub** Feb 2026 – Mar 2026
- Built a full-stack on-demand labour marketplace supporting 4+ user flows (user, worker, admin, notifications) with real-time task updates and live GPS tracking using Socket.IO.
 - Designed scalable backend APIs (20+ endpoints) with JWT authentication, OTP-based task verification, and atomic task assignment, ensuring secure and reliable task lifecycle management.
 - Implemented location-based task discovery, penalty tracking, and anomaly detection (GPS filtering), improving platform reliability and reducing invalid task interactions by 40%.
- Tech:** MERN, Socket.IO, MongoDB, Cloudinary
- Driver Sentiment Engine | GitHub** Dec 2025 – Jan 2026
- Engineered an async sentiment analysis platform handling 1000+ feedback submissions/sec using BullMQ and Redis-backed queues, reducing API latency to <5ms.
 - Designed a multi-entity analytics system (drivers, trips, app, marshals) with O(1) updates using Redis data structures, maintaining real-time averages, trends (last 20 scores), and deduplication.
 - Implemented alerting logic with threshold-based triggers and TTL cooldowns, enabling automated anomaly detection and reducing repeated alert noise by 60%.
- Tech:** Node.js, TypeScript, Express, Redis, BullMQ
- Student Management Platform | GitHub** Oct 2025 – Nov 2025
- Implemented a CI/CD-driven Student Management Platform using Spring Boot, MySQL, Docker, and Kubernetes, orchestrated with a Jenkins pipeline, enabling automated build, containerization, and deployment of microservices.
 - Configured and maintained Jenkins build servers and Maven repositories, which improved build success rates by 40% and reduced developer wait times by 25% weekly.
 - Delivered a scalable, containerized microservices system for managing student records, reducing deployment overhead by ~40% and demonstrating infrastructure-as-code reliability and streamlined DevOps workflows.
- Tech:** Spring Boot, MySQL, Docker, Kubernetes, Jenkins, Maven

TRAINING

- Lovely Professional University | Certificate** Jun 2025 – Jul 2025
- UI/UX Design Using Figma
- Completed structured summer training in UI/UX design, focusing on user-centered workflows, design thinking principles, and accessibility-oriented interface structuring.
 - Designed 15+ wireframes and interactive prototypes using Figma, creating responsive layouts and component-based designs to strengthen understanding of user interaction patterns.
 - Successfully enhanced visual and UX design capabilities, demonstrating the ability to translate user requirements into intuitive, scalable interfaces aligned with modern design standards.

TECHNICAL ACHIEVEMENTS

- Solved 550+ problems across [LeetCode](#), [GeeksforGeeks](#) and [HackerRank](#).
- Achieved a LeetCode contest rating of **1577** (Top 26% globally).
- Earned **5-Star** in C++ on HackerRank.

CERTIFICATES

- Cloud Computing | [NPTEL](#) May 2025
- Fundamentals Of Network Communication | [Coursera](#) Nov 2024
- Introduction to Hardware and Operating System | [IBM](#) Sep 2024
- The Bits and Bytes of Computer Networking | [Google](#) Aug 2024

EDUCATION

- Lovely Professional University** Phagwara, Punjab
B.Tech in Computer Science and Engineering – CGPA: 8.26 Aug 2023 – Present
- Rajkiyakrit Janta Ucch Vidyalaya** Begusarai, Bihar
Intermediate (PCMB) – Percentage: 71.4 Apr 2021 – May 2023
- Buddha Woodland Public School** Samastipur, Bihar
Matriculation – Percentage: 61 Apr 2020 – May 2021
